

1. WAP to calculate Simple Interest. $SI = (p \times r \times t) / 100$ 2. WAP to calculate area and perimeter of a rectangle. $a = l \times b$, $p = 2(l + b)$ 3. WAP to calculate area and perimeter of a square. $a = \text{side} \times \text{side}$, $p = 4 \times \text{side}$ 4. WAP to calculate area and circumference of a circle. $a = \pi \times r \times r$, $c = 2 \times \pi \times r$ 5. WAP to enter 2 no.s from the user and perform addition, subtraction, multiplication, division and modulus in 1 program. 6. WAP to input time in seconds and convert them into minutes and seconds. for e.g. Input - 85 s Output - 1 min 25 s
